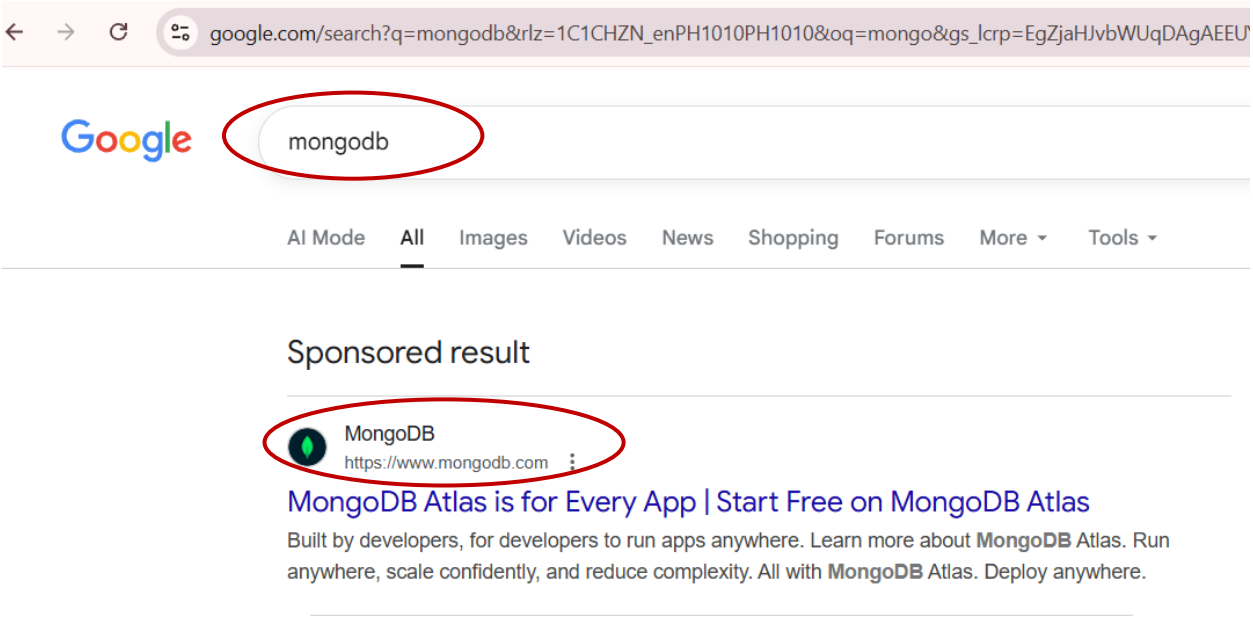
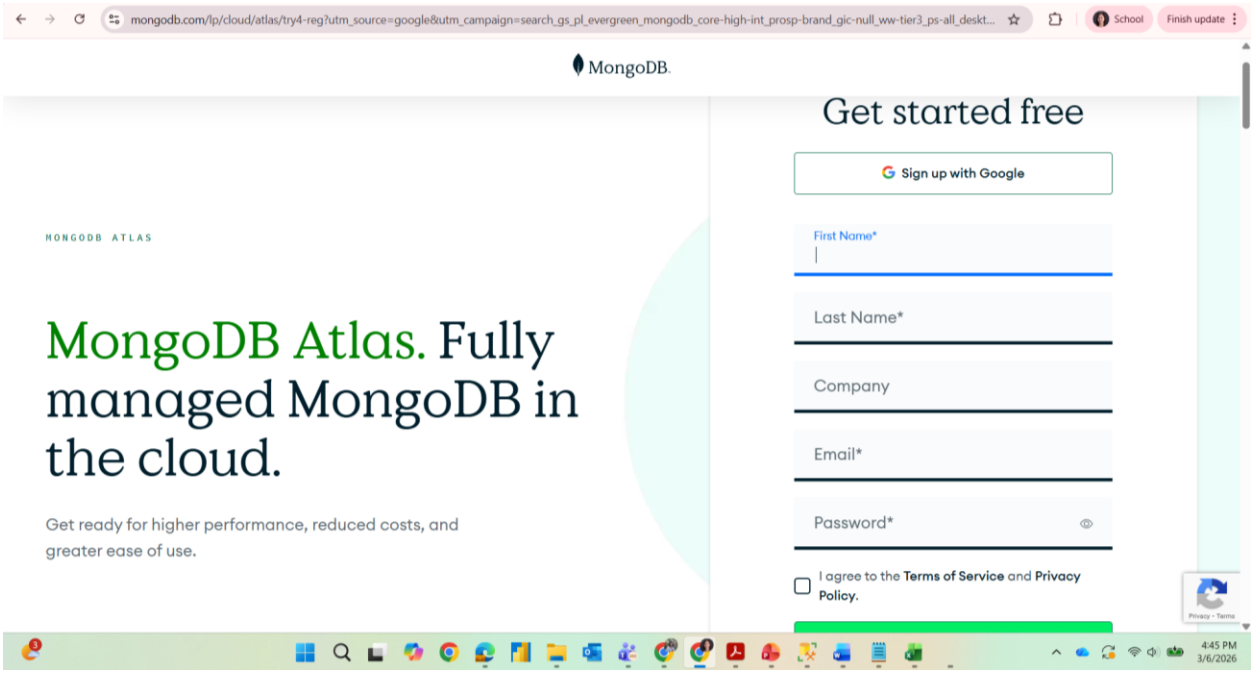
Guide for installing MongoDB

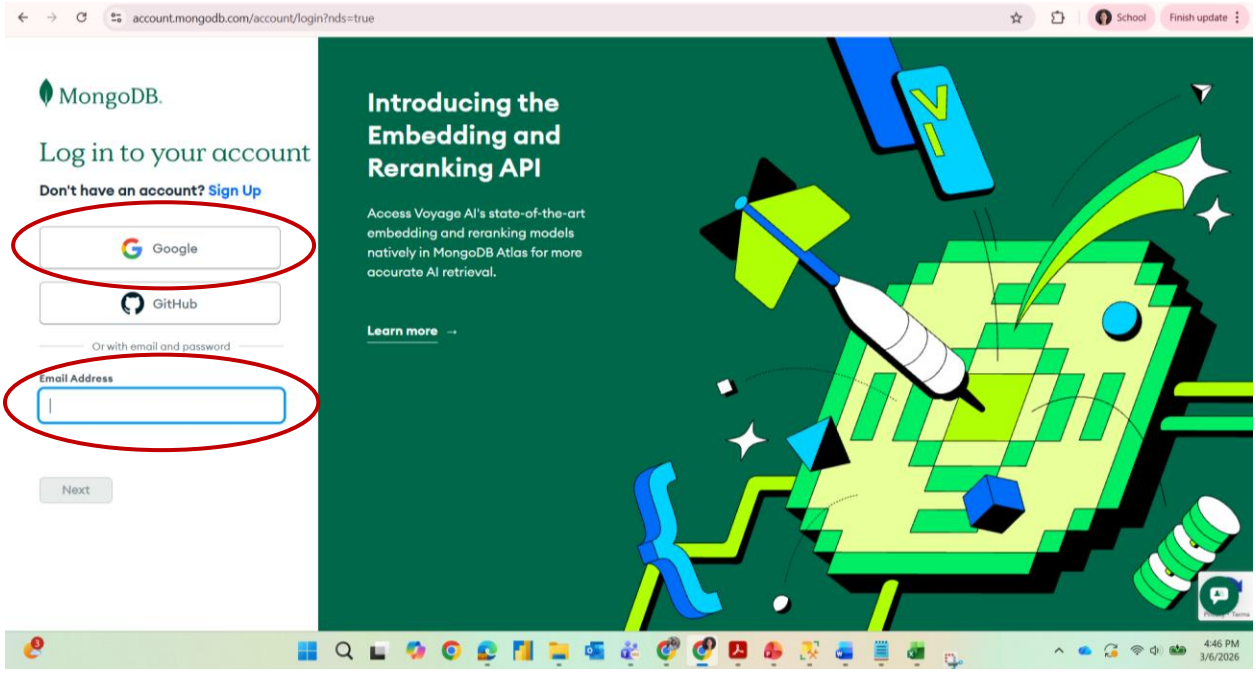
1. Search for MongoDB, see Screenshot below:

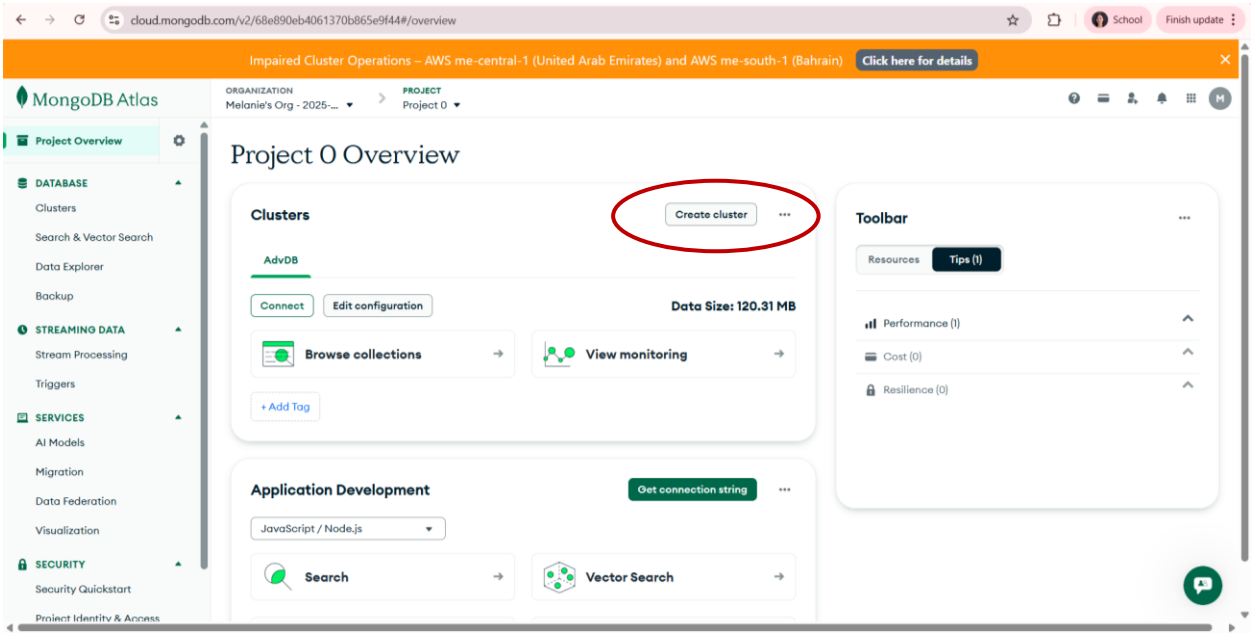


2. Click Sign-up

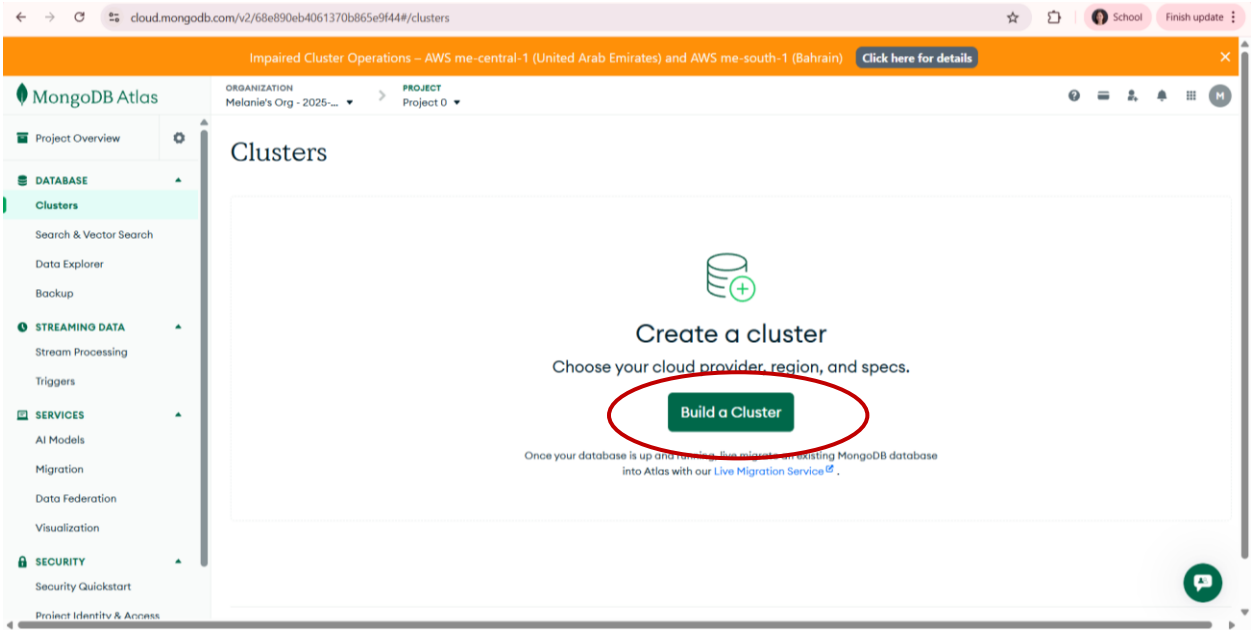


3. Click Sign in by supplying your email, or you can log in using your Google account.

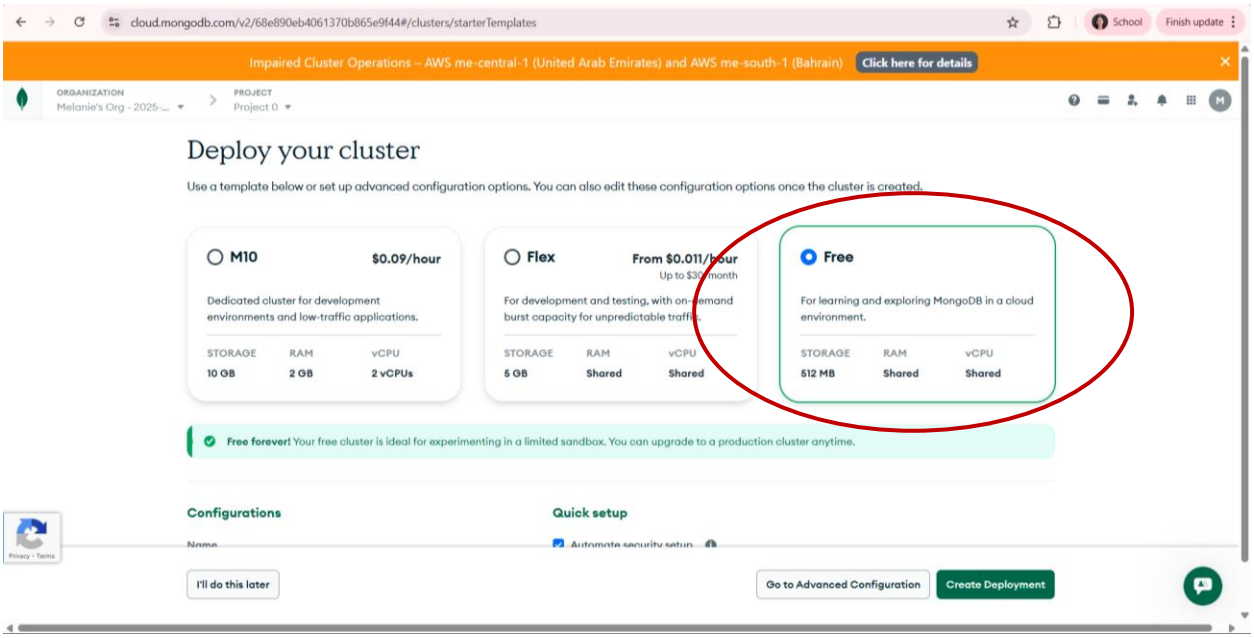




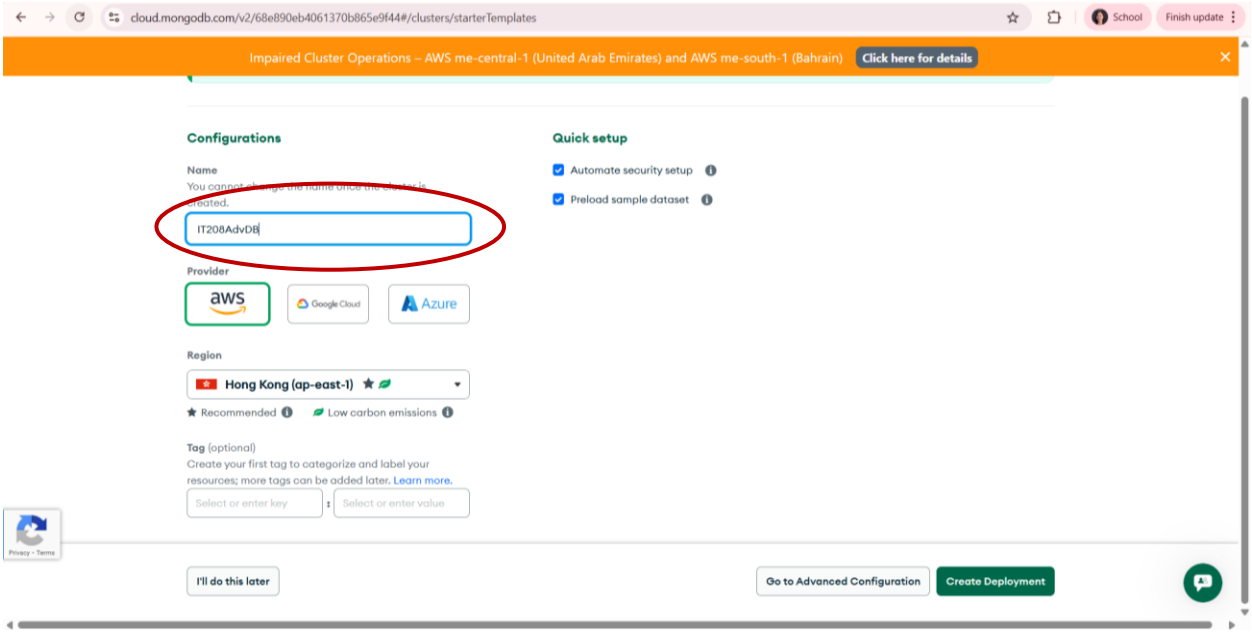
5. Next step is to Build Cluster

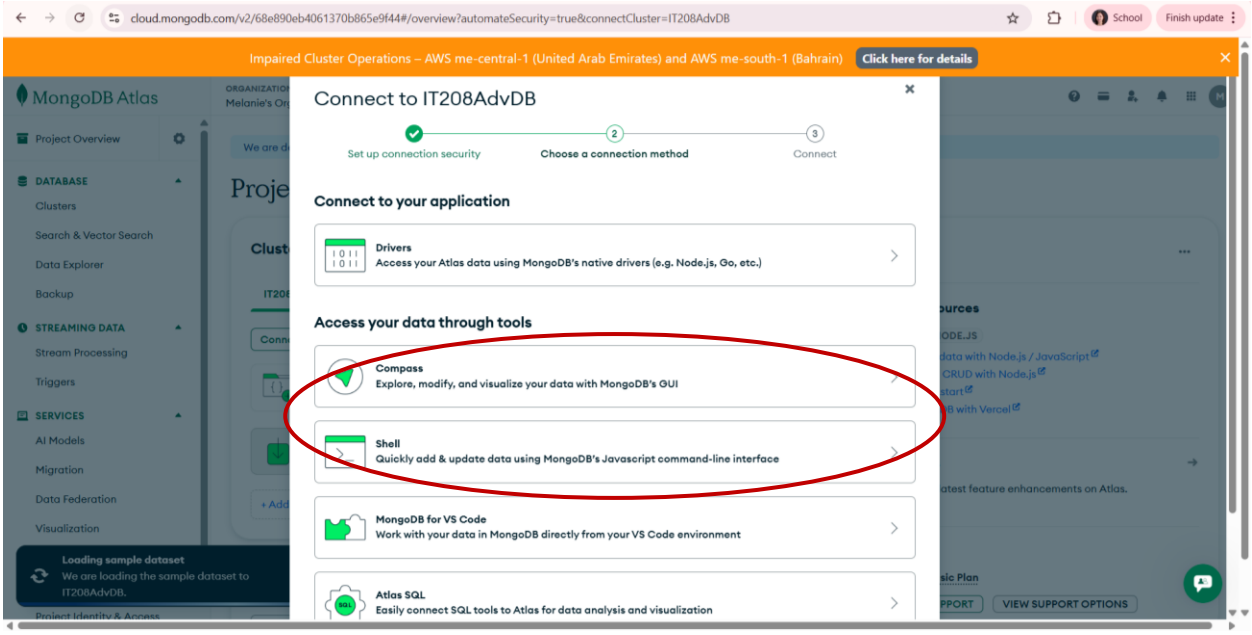


7. Select Free

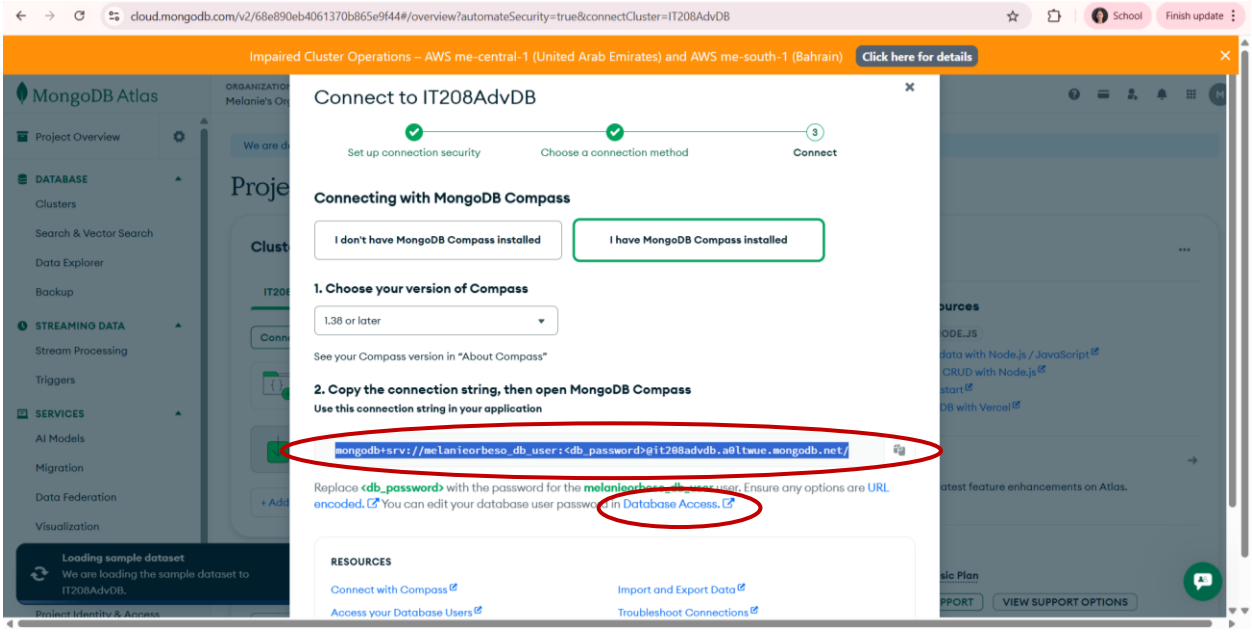


8. Supply the Cluster Name

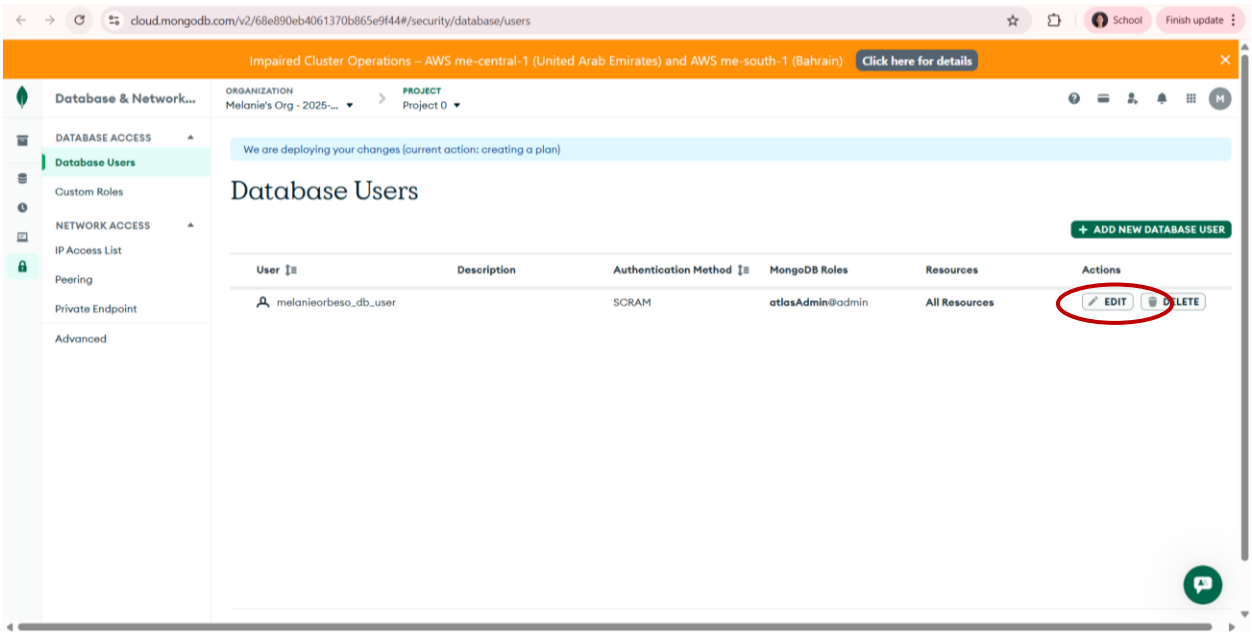


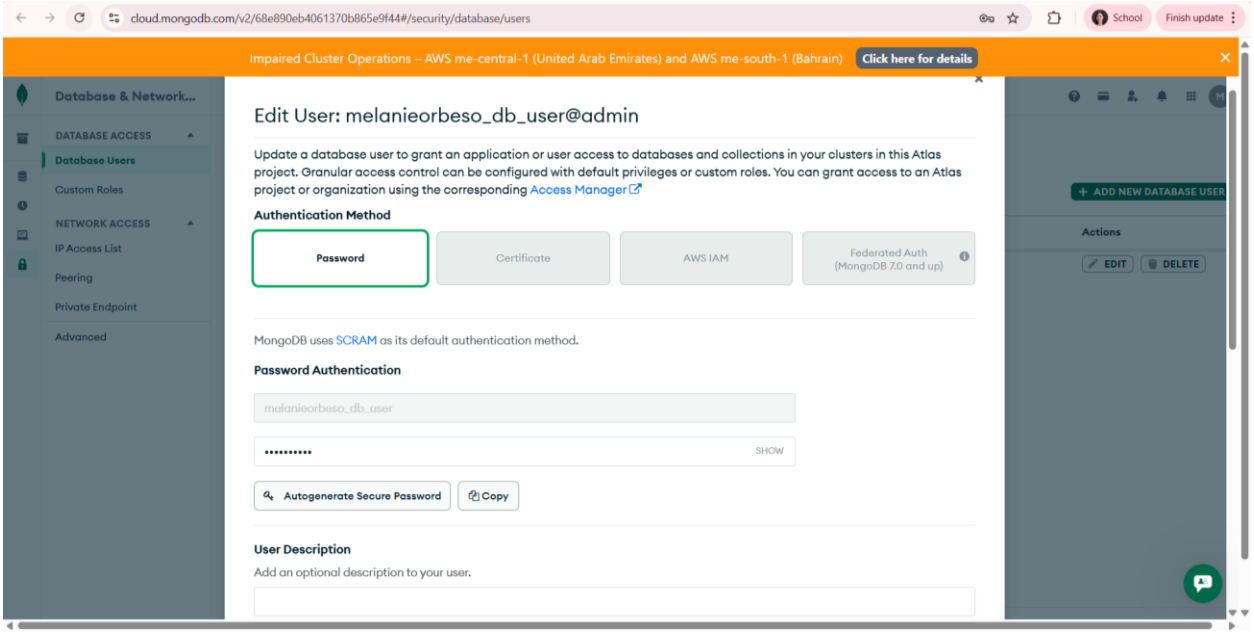


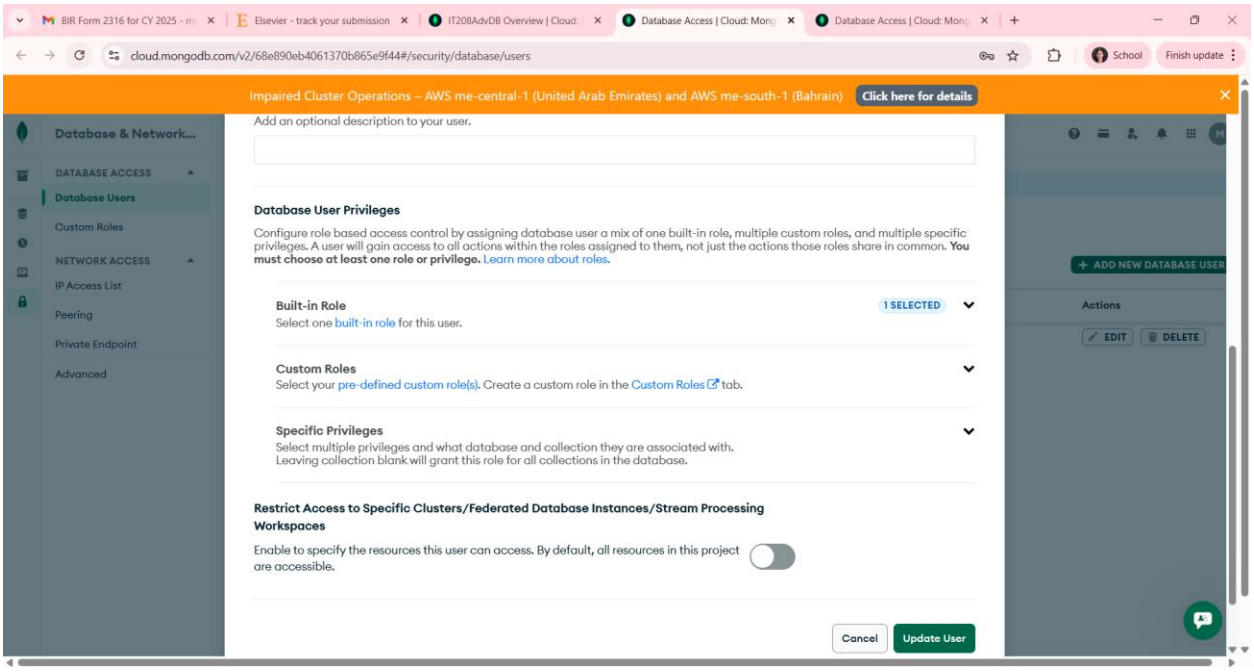
10. Choose Compass or choose Shell, then copy the connection string. You can use Notepad to save your connection string and password. Click the Database Access link to change the password.



11. Click edit







12. Open PowerShell

```
Windows PowerShell
Windows PowerShell
Copyright (C) Microsoft Corporation. All rights reserved.

Install the latest PowerShell for new features and improvements! https://aka.ms/PSWindows

PS C:\Users\ACER>
```

13. Supply your string connection and password.

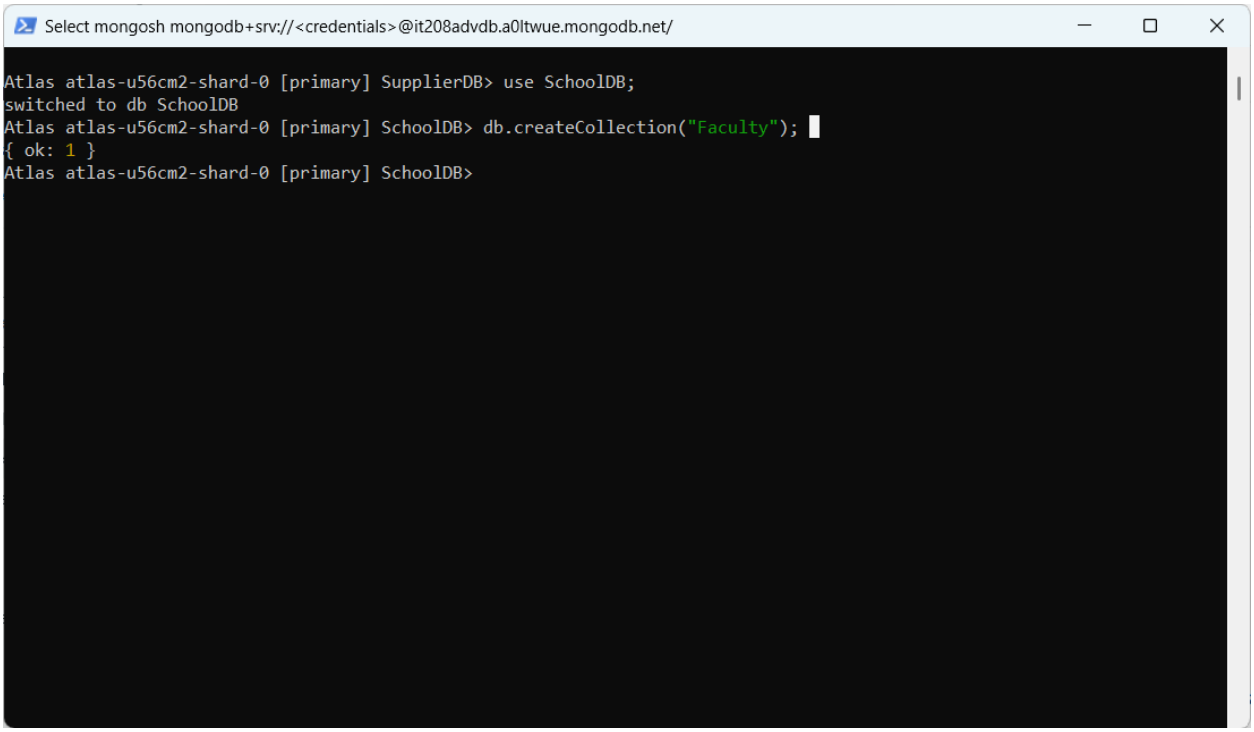
```
mongosh mongodb+srv://<credentials>@it208advdb.a0ltwue.mongodb.net/
Windows PowerShell
Copyright (C) Microsoft Corporation. All rights reserved.

Install the latest PowerShell for new features and improvements! https://aka.ms/PSWindows

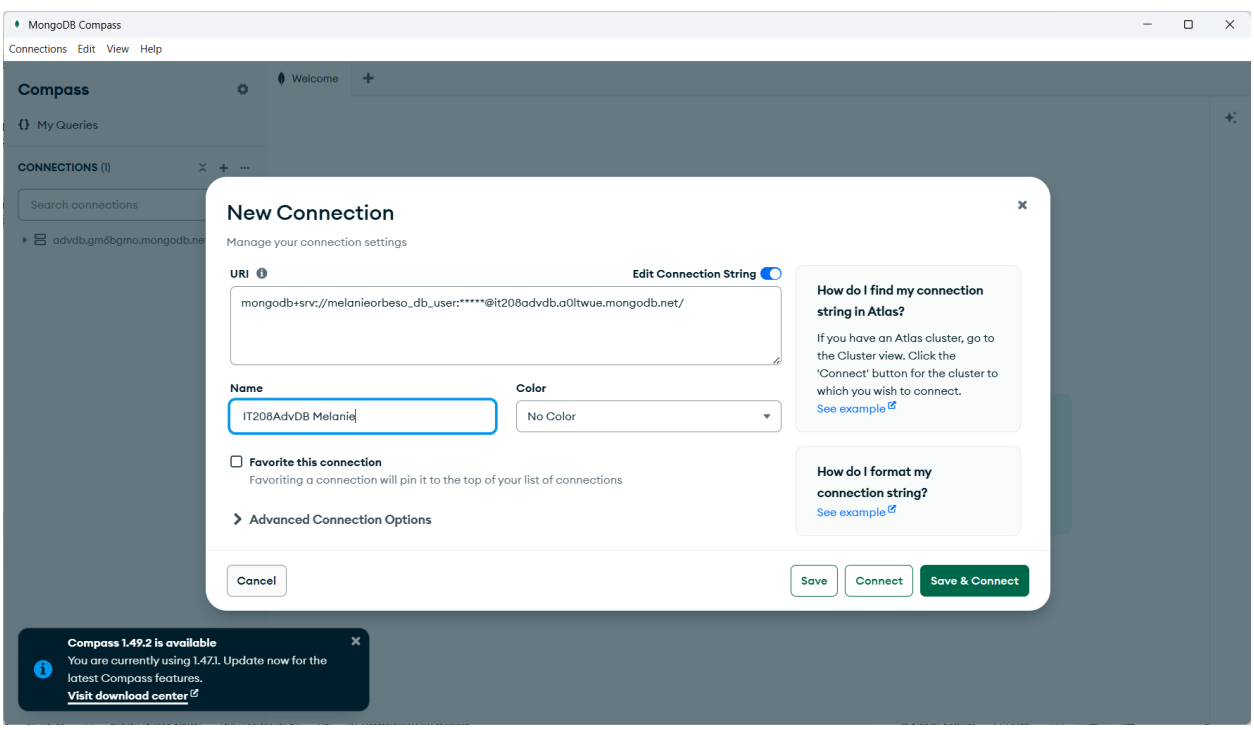
PS C:\Users\ACER> mongosh "mongodb+srv://it208advdb.a0ltwue.mongodb.net/" --apiVersion 1 --username melanieorbeso_db_use
r
Enter password: **********
Current Mongosh Log ID: 69aa9de4b4f4466743cebea3
Connecting to:          mongodb+srv://<credentials>@it208advdb.a0ltwue.mongodb.net/?appName=mongosh+2.5.8
Using MongoDB:          8.0.19 (API Version 1)
Using Mongosh:          2.5.8
mongosh 2.7.0 is available for download: https://www.mongodb.com/try/download/shell

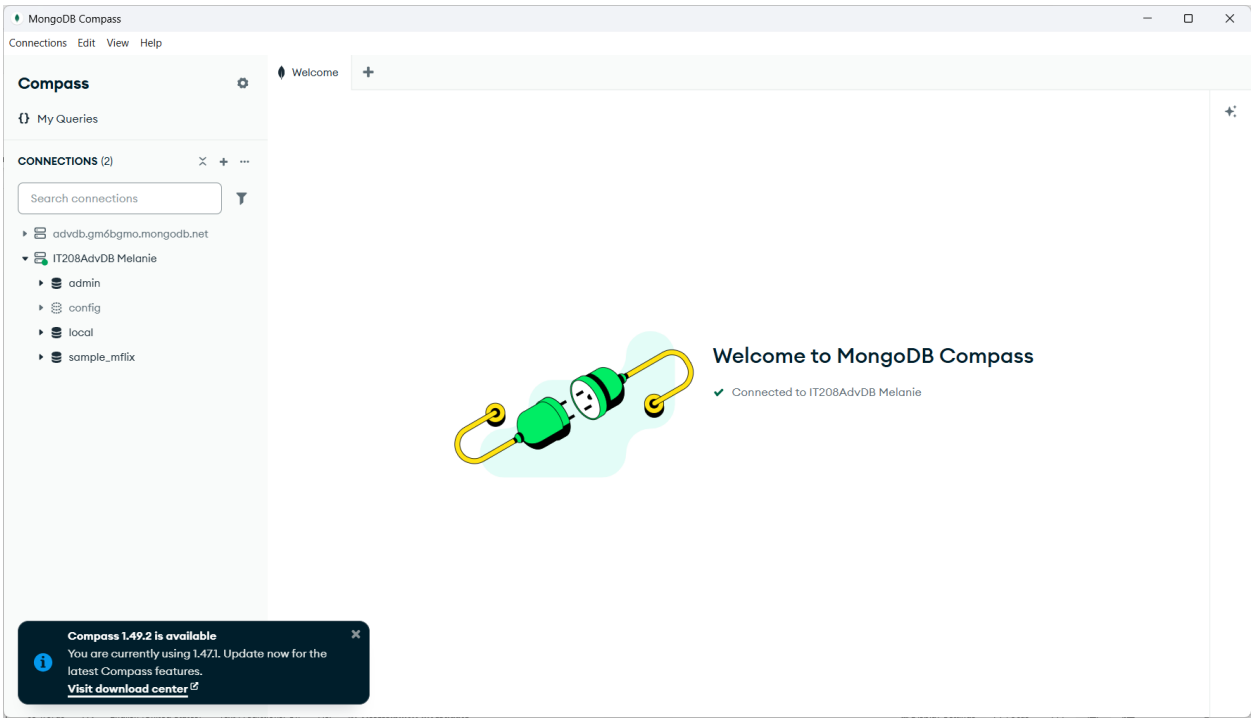
For mongosh info see: https://www.mongodb.com/docs/mongodb-shell/

Atlas atlas-u56cm2-shard-0 [primary] test>
```



You can also open your installed MongoDB Compass now, then enter your connection string and password.





13. Click the Save and connect button, and you'll see the UI of MongoDB Compass.
